PROJECTS

- **Shoppinghub** | [link](#)

Key Skills Used: MongoDB, Express.js, React.js, Node.js, Redux Toolkit, Tailwind CSS

Shoppinghub is a full-stack e-commerce application that allows users to seamlessly browse, search, and purchase products. It includes features such as product listing with category-based filtering, detailed product pages, and a secure Login/Register system. The application provides a dynamic Cart and Checkout system with real-time price calculations and quantity updates. Built with a responsive design using React.js and Tailwind CSS, and efficient state management via Redux Toolkit, it ensures smooth navigation and user experience. The backend, powered by Node.js, Express, and MongoDB, handles product data, authentication, and order management effectively.

- **Blogify** | [link](#)

Tech Stack: MongoDB, Express.js, React.js, Node.js, Redux Toolkit, Tailwind CSS

Description:

Developed a full-stack blog website where users can create, read, update, and delete blog posts. Implemented user authentication and comment functionality. Used Redux Toolkit for state management and integrated RESTful APIs to handle dynamic blog content. Ensured responsive UI with Tailwind CSS and deployed the application for real-world usage.
